

Ex.no:7B	DATA VISUALIZATION USING TABLEAU

Aim:

To perform data analysis, data preparation, and visual exploration on the ev sales dataset (ev_sales.csv) in Tableau Desktop/Prep to analyze booking patterns and customer demographics for actionable hospitality insights.

Algorithm:

1. Data Ingestion & Connection

Connect Tableau Desktop to ev_sales.csv as a text file source.

Verify field data types (e.g., date formats, integer values for lead time/guests, string values for country and reservation status).

2. Data Cleansing & Transformation

Handle missing or null values across critical columns like country, and agent.

Create calculated fields for key metrics (e.g., total revenue, cancellation rate).

3. Exploratory Visual Analysis

4. Booking Dynamics: Plot booking lead times against cancellation rates to identify patterns.

5. Demographic & Market Segmentation: Analyze origin countries and market segments (e.g., Direct, Corporate, TA/TO).

6. Seasonality Trends: Map arrival dates across months and years to highlight peak/off-peak booking trends.

7. Dashboard Assembly & Formatting

Combine key worksheets into an interactive executive dashboard.

Apply global interactive filters (e.g., EV Type, Year, Market Segment) across all dashboard components.

Output:

Making a Top 10 sales:

1).Apply filters:

2). Make DashBoard in Tabulaue:

Result:
